

2025 EARNINGS PRESENTATION & 2026 OP GUIDANCE

Based on BRSA Consolidated Financials

February 4th, 2026

MACRO RECAP

TURKISH ECONOMY (I/II)

GDP GROWTH

(YoY)

- We nowcast **~3.5% y/y GDP growth in 4Q25**; after attaining 3.7% y/y growth in the first three quarters of 2025.

CBRT FUNDING RATE & CPI EXPECTATIONS

(End of the Period)

- Consumer inflation surprised to the downside (<2%) in late 2025; but core inflation indicators stayed sticky at 2%.
- We **maintain our call of 25%** for 2026-end **inflation**
- CBRT would reduce the **policy rate to up to 32%**.

TURKISH ECONOMY (II/II)

CA DEFICIT / GDP (year end)

CG BUDGET DEFICIT / GDP (year end)

- Under the assumption of **strong tourism revenues, resilient foreign demand, and low energy prices**, the current account deficit is expected to remain moderate in the near term.

- Cash balance signaled **stronger fiscal consolidation** efforts as of end 4Q25. Cash deficit to GDP ended 2025 at 3.4%, lower than the initial estimates (around -4%), led by mainly the **boost in revenues and the decrease in earthquake spending**.

*As per the regulation announced at the end of December, for tax accounting purposes, inflation accounting is no longer applicable to the prepaid expenses, and fixed assets are now revalued using the revaluation rate instead of the inflation rate. Accordingly, the December financial statements also reflect these adjustments for the first eleven months of the year.

Key P&L metrics remained consistent with guidance.
ROE realization was marginally below guidance, reflecting the impact of a tax regulation change.
